

GALV 0201-IAEI

Now there's an easier way to know if ground rods meet code.

Just apply the Galvan ground rod gage. If the rod fits inside the gage, then look for UL markings. Galvan's UL-Listed copper-clad and galvanized rods are clearly marked with the UL symbol near the drive end to make code compliance easy to verify. **If there's no UL symbol and the rod fits in the gage, it doesn't meet the NEC. Period.** To get your **FREE** Galvan ground rod gage, visit www.galvanelectrical.com/rodgage. And for safety's sake, always look for UL-Listed Galvan ground rods, built to provide safe grounding for 40 years or more in most soil conditions.

 **GALVAN Ground Rod Gage**

Look for UL marking
if rod fits in this slot.
